PROJECTS

Airfare Prices Prediction Using Machine Learning

- Developed a machine learning model to predict airfare prices, providing a solution to uncertainty in flight pricing.
- Implemented data preprocessing techniques and feature engineering to improve prediction accuracy.
- Utilized Python libraries such as Pandas, NumPy, and Scikit-learn for model development and evaluation.

Using Existing CCTV Network for Crowd Management, Crime Prevention & Work Monitoring Using AI & ML

- Designed a system monitoring CCTV networks using Machine Learning.
- Improved model performance by optimizing hyper parameters and utilizing transfer learning techniques.
- Explored potential applications are security related applications, especially for high risk and crowded areas.

ACHIEVEMENTS

- Computer Science(Internet Of Things) Club Coordinator at Sri Indu Institute of Engineering and Technology.
- Organized and managed a campus event attended by over 500 students.
